

Eclipse[®] Complete Sealing Soft-Sided Dock Shelter

The Eclipse shelter, together with the PitMaster[™] Under-leveler Seal, offers the most effective environmental control possible around all four sides of your loading dock openings.

1 Seals trailer top:

Heavily weighted head curtain

Creates a tight seal along full width of the trailer, using gravity to block gaps and maintain constant contact during trailer bounce. Self-adjusts to wide range of trailer heights. Diverts rain without the need for additional overhead device.

2 Seals the corners:

Integral fabric sealing pockets

Side curtains and weighted head curtain work together when trailer backs in for complete corner black-out. Sealing pockets connect sides to top, blocking gaps that other shelters cannot address.

3 Seals the sides:

GapMaster[™] hooks

Side curtains feature durable, detachable hooks to seal exposed trailer door hinge gaps without restricting access to loads. These gaps add up to over 2 1/2 sq. ft. (.23 m²) of open air if left unsealed. Outer fabric sleeves conform around hinges for a tight side seal.

4 Seals the bottom:

PitMaster sealing system

Gaps large and small beneath and around the dock leveler are sealed with optional PitMaster components, providing substantial energy savings, and improving cleanliness and sanitation.

Rite-Hite[®] Eclipse Dock Shelter shown with PitMaster Under-leveler Seal.

Eclipse® Shelter (620G)

Ordinary dock shelters leave gaps where contaminants can enter your facility and expensive energy can escape.

Only the Eclipse dock shelter can effectively seal the gaps at the trailer top, corners, and sides, providing a complete, dark seal.

What does daylight mean at your loading dock? It means there are gaps in your environmental seal, holes through which contaminants can enter your facility and expensive energy can escape. Only the Eclipse shelter is equipped to fully obscure daylight and effectively seal these gaps, in a single piece of equipment.

Exclusive durability features.

- » **High-strength Durathon™ Fabric**
Side curtains hold up under extreme wear and tear with the industry's only friction-resistant fabric with rugged pebble-grain surface.
- » **Impactable Header**
Super tough front impact plates protect weighted sealing header from trailer strikes. Pivoting header frame resists damage from trailers coming in off-center and higher than expected.
- » **Slim, Crushable Side Frames**
Take repeated hits from off-center trailers without damage or the need for expensive steel bumpers. Poly-wrapped foam side frames give unit stability, yet can be fully compressed — immediately returning to original shape and position if impacted.

Durathon friction-resistant fabric.

Impactable header.

Guaranteed performance.

Eclipse shelters with Durathon side curtains are backed by a 36-month money-back guarantee, ensuring your investment meets your performance expectations.
